SafeAir™ SINK DISPOSAL SWITCH

Easy Installation Instructions

1. Mount air button
To mount on counter top:
Drill 1 ¼" hole in counter top.
Use rubber gasket above counter and tighten with plastic nut from below counter.
– OR –
To mount air button on sink top:
Use hole for sprayer or soap dispenser. Use rubber gasket above sink and tighten with plastic nut from below sink.
2. Attach one end of air tube to bottom of button and the other end to the white nib on the black converter box. Note: Air tube can be cut to length as necessary.
3. Plug SafeAir converter box into wall outlet. (Outlet should be three-prong grounded outlet.)
4. Plug sink disposal cord into SafeAir converter box.

Operation

To start disposal, press and release air button.
To stop disposal, press and release air button a second time.
